Web Developer – Full Stack

Hiring organization
Tech-Fius Orbit Private Limited

Employment Type
Full-time, Contractor

Date posted
August 20, 2025

Description

Techfius is expanding its technology division and looking for a creative and dedicated **Full Stack Web Developer** who can bring our websites, applications, and dashboards to life with clean, efficient, and modern code.

This role is perfect for developers passionate about **responsive design**, **performance optimization**, and **SEO-driven development**.

Location: Remote / onsite (Hybrid)
Type: Full-Time | Contract-Based
Experience: 1–3 Years preferred (Freshers with strong portfolios welcome)

? **Qualification**: Bachelor's degree in Computer Science, IT, Engineering, or relevant field
Apply Now: Send CV + portfolio to hr@techfius.com
? **Company**: www.techfius.com

Responsibilities

- Design and develop interactive websites, client portals, and admin dashboards
- Build front-end using **HTML5, CSS3, JavaScript**, and frameworks like **React** / **Vue** / **Bootstrap**
- Develop back-end using **PHP, Node.js, or Python**, integrating with **MySQL** / **MongoDB** databases
- Manage hosting, domain setup, DNS, and cPanel deployment
- Optimize website for SEO, page speed, and mobile responsiveness
- Implement security best practices and ensure code scalability
- Collaborate with UI/UX team, digital marketers, and product managers
- Maintain, upgrade, and debug existing websites and CMS platforms (WordPress preferred)

Required Skills

- Proficient in:
  HTML, CSS, JavaScript, PHP, MySQL
  OR
  Node.js, MongoDB, Express, React
- CMS: WordPress Theme & Plugin Development
- Deployment: Hosting, FTP, cPanel, Domain Setup, SSL

- Tools: Git, VS Code, Postman, Google Analytics, Search Console
- SEO: On-page SEO, Schema Markup, Meta Optimization, Sitemap creation
- Basic knowledge of web security, error logging, and database optimization

Preferred Skills (Bonus)

- Experience with:
    - ReactJS / Next.js / Nuxt
    - Google APIs (Maps, Calendar, Forms)
    - Payment Gateway Integration (Razorpay, Stripe, etc.)
    - Firebase Authentication & Firestore
    - Linux command-line hosting or VPS experience
